

About Us

Kern AG develops user-friendly **software solutions** for corporate planning and reporting in the areas of **controlling** and **finance**. Key to the Kern concept is the complete **integration of Excel into SAP**. The Allevo SAP integration closes the gap between the two systems, speeding up your planning and improving the quality of your processes.

Speed & Integration

Access your SAP data in real time without additional interfaces. React quickly to events, calculate scenarios and make your daily work faster and more efficient with Allevo.

Security with SAP

Allevo always takes into account your existing SAP authorization concept and is therefore 100% SAP compliant. There is no duplicate data storage: Allevo posts all data directly in the SAP system.

User-Friendliness with Excel

With Allevo, you use Microsoft Excel as the user interface and SAP as the base application. You don't need comprehensive knowledge of SAP or other programming skills.

Everything from a Single Source

Benefit from our expert knowledge of the interactions between Microsoft Excel and SAP. Take advantage of our total package consisting of development, consulting and support.

Allevo
by Kern AG

Our Solution

Allevo fully integrates Microsoft Excel into SAP for the following application areas:
